

The residential/commercial solar permits process has been streamlined to combine the building permit and electrical permit into one permit. You are no longer required to apply for electrical permits as a child or service upgrade. If a service upgrade is required, fill-in those fields on the Solar Detail Page. Fees for the electrical child permit and service upgrade permit are incorporated into the cost of the solar permit.

Solar Mount * # of KWatt / AC hours *

Electric service
If upgrade required then make selections

Electrical service upgrade required? * Amp size of upgrade

Enter amp if you chose 'other': ⓘ

I have attached the Letter of Intent and reviewed the Solar Checklist ⓘ

Complete all required fields on the Solar Detail Page. Solar permits no longer require a separate electrical permit for the work connected to the solar panels, or a separate electrical permit if a service upgrade is required. Those are included in the solar permit application.

Description	Request Date	Scheduled Date
Solar Final  ID 175928		Request Inspection
Solar Service Upgrade  ID 175929		Request Inspection
Solar Rough  ID 175930		Request Inspection

When scheduling inspections, you will have three options: Rough, Final, and Service Upgrade.

Residential Solar - Typically only requires a final inspection to be scheduled. If you believe a rough inspection is required, you can schedule one at your discretion. If a service upgrade was performed, that must also be scheduled.

Commercial Solar - Requires a rough and final inspection. If a service upgrade was performed, that must also be scheduled.
