DAVIS PARK IMPROVEMENTS

The Davis Park Improvement project started on September 30, 2025. The Davis Park at Founders Landing is under construction and closed for public use. Completion of the Davis Park Improvement project is scheduled to be completed the Spring of 2026.

This project consists of site improvements along with new building installations. The site improvements include seawall repair, river walk realignments, multiuse path improvements, custom playground installation, skatepark installation, grading and landscaping improvements, and installation of a new parking lot south of the Railroad tracks. The new building installations include a concession and multi-restroom building and a stage with greenroom building.

All appropriate traffic control measures and marked detour routes will be in place to help safely guide traffic. Those using the river walk path will be detoured to S. Main Street on the north and south end of Davis Park.

This project is funded by State grants and City funds.

For questions regarding this project, please contact Ryan Lundberg, Project Manager, at (779) 348-7644.
