

Android Directions:

FIRST – Add the app to your home screen.

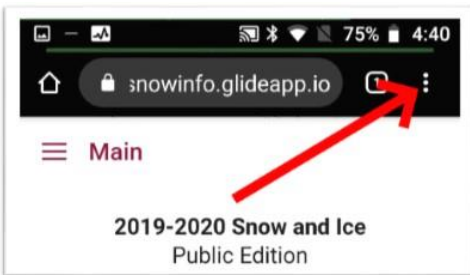

Open link in Google Chrome.

There MAY be a pop up at the bottom that says “Add 2019-20 Snow & Ice Public Edition to Home Screen

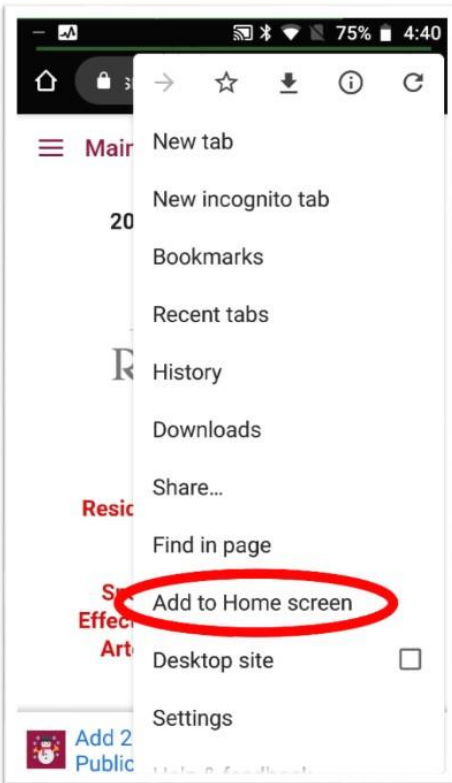

If that's there – CLICK IT. The shortcut to the App should appear on your home screen.

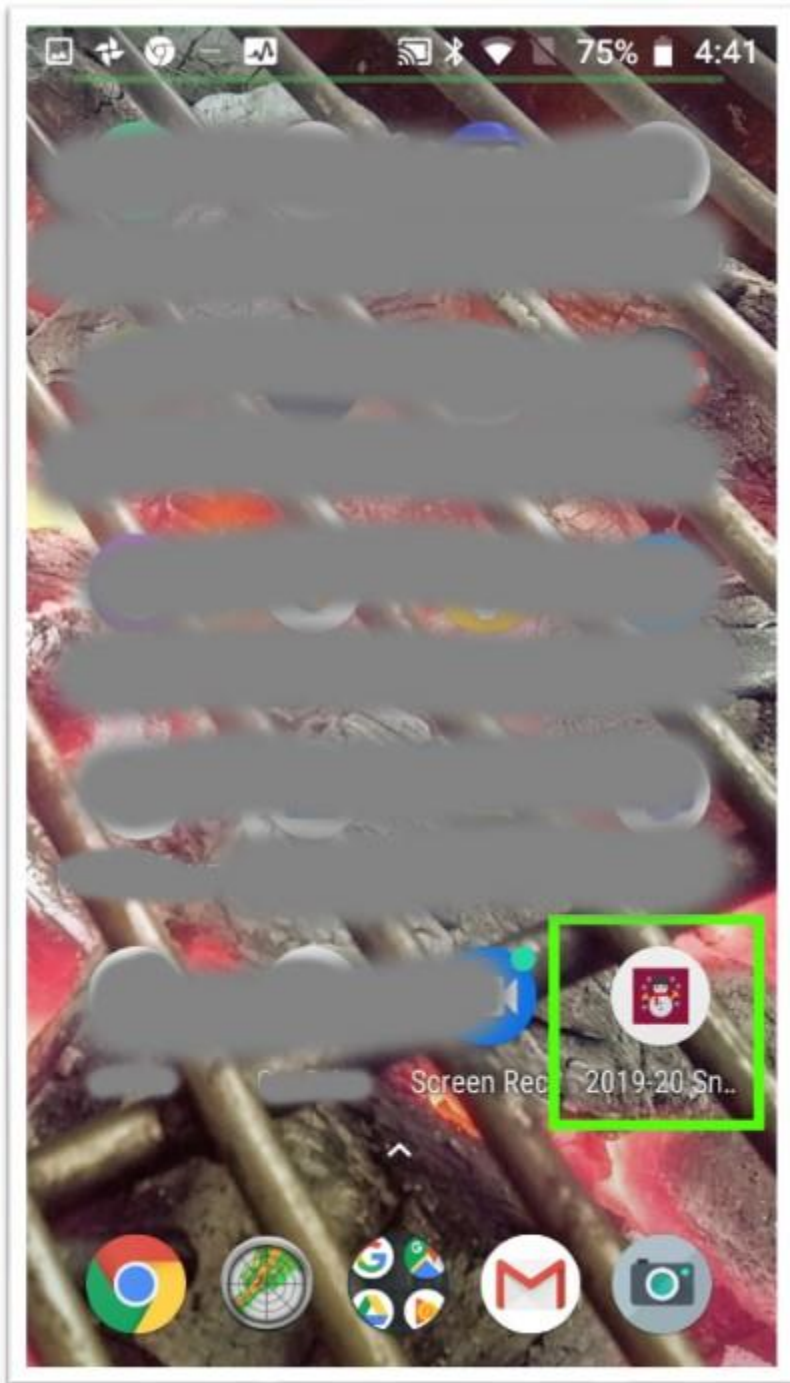

If the pop up isn't there. Click the Chrome Menu (3 dots in upper right corner next to URL bar)

About 3/4 of the way down the screen is a choice to add to Home Scree. CLICK IT.

This will place a shortcut to the app on your home screen.

Once the shortcut has been added to the home screen:
Enter your Email and click GET PIN
Check your email and enter PIN.

iOS directions:

The instructions in this article apply to all iOS devices including iPhone, iPad, and iPod touch.

How to Add Safari Shortcuts to Your iOS Home Screen

- 01** Launch [Safari](#) and navigate to a website you frequently visit.
- 02** Tap the **Bookmark** icon at the bottom of the screen (it resembles a box with an upward-pointing arrow).
- 03** Tap **Add to Home Screen**.
- 04** Accept the suggested name for the shortcut, or enter one you like better.
- 05** At the top of the screen, tap **Add** to save the new shortcut icon to the home screen.

You'll now see the new icon next to all your other app icons. If you use [several home screens](#), you may need to scroll through them to locate it. To use the icon, just tap it to go directly to the saved website in Safari.
